Forms and Gears ties up with Toshiba

Chennai: The Chennai-based fixture builder Forms and Gears has partnered Toshiba of Japan to design and develop "the largest set of hydraulic machining centre fixtures".

According to a press release from Forms and Gears, the fixtures would be over

five metres long and operate on high pressure hydraulics, and to be used for machining of large earth moving equipment parts. Forms and Gears with three facilities in Chennai is one of the few well-integrated fixture builders in Asia, says the release. — **Our Bureau**
